Although every precaution will be made to ensure your safety and well-being before, during and after your tinting application please initial with an X, your awareness of the possible risks as outlined below:

I understand that the treatment is a safe procedure and there is no recovery time for most people.

I understand that tinting eyelashes or eyebrows and lifting or curling eyelashes has some inherent risk of irritation to the orbital eye area, including the eye itself, and could result in stinging or burning, blurry vision and potentially blindness should the tint enter the eye.

I understand that if the tinting agent, developer, or mixture of both accidentally comes into contact with my eyes, my eyes will be flushed with water and saline solution and medical attention may be required.

I understand that some irritation, itching or burning may occur to the skin which comes in contact with the tinting agent.

I understand that there may be some residual dark staining left on the skin following the tinting process of either my lashes, brows or both. This will fade and go away within a short time.

I understand that, while every attempt will be made to provide me with my chosen color, everyone's hair absorbs color differently and my final results may not be the color I initially wanted.

I understand that over the course of several weeks, the tint will gradually lighten and fade. Re-tinting will be required to keep the new color fresh. Most clients need to re-tint every 3-4 weeks.
